

## HAMMEL primary shredder type VB 950 DK – RED GIANT NEW VERSION

### drive

- diesel motor CAT approx. 760 PS Tier 4i
- latest generation hydraulics therefore higher nominal torque on the shafts
- more efficient new cooling system (side cooler no longer required), better airflow in engine room
- significant noise reduction due to reduced engine speed (1,800 rpm) and no cooler required
- oil pan for maintenance easy to dismantle, thus better accessibility to the diesel engine
- bearing glands have integrated lifting lug for shaft changing

### control

- proven “easy to use control” (mobile SPS)

### tilting hopper

- tilting hopper with lay-up surface for long materials such as long wood
- steeper work angle thereby better material infeed

### permanent over-belt magnet

- parallel to the discharge belt and adjustable; optimal separation of FE
- the magnet can be positioned higher above the belt when not in use

### discharge belt

- new band construction
- discharge height increased to approx. 5,000 mm (35 degrees)
- drive via a less sensitive low-maintenance chain coupling
- belt speed of the horizontal belt and the discharge belt controllable via potentiometer

### special features

- integrated warning lights for emergency stop and diesel reserve positioned on both sides and clearly visible
